How CityFM learns: by comparing

It is never told what anything is. It is shown things that belong together, mixed in with things that don't, and learns to tell them apart.

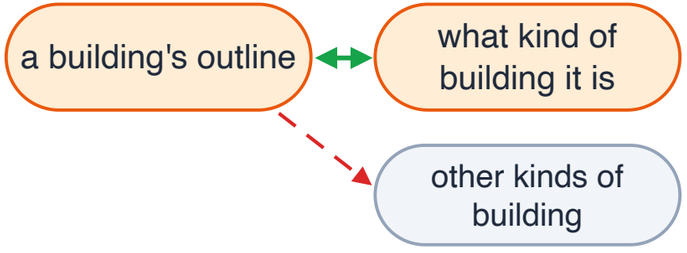

Repeated thousands of times, this places things that belong together close to each other.

1 Places

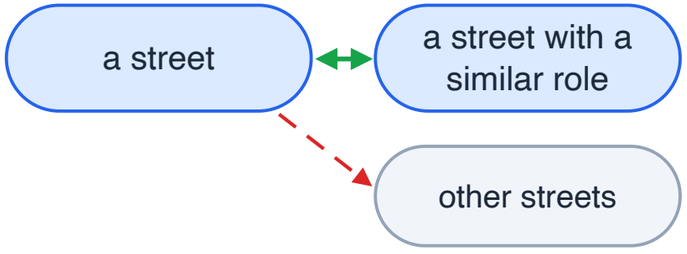

learns which kinds of place are found together

2 Buildings

learns to recognise buildings from their shape and size

3 Streets

should learn how streets fit into the network

doesn't work yet: a new target is planned
